ABOUT ME

I work as a software engineer with a keen interest in web development, which I have refined through hands-on experience at Ford9Solution and NIC University of Swat. During my internship at Ford9Solution, I enhanced my web development skills significantly. Subsequently, at NIC, I worked closely with backend and IoT specialists on the Touch Tally (Fingerprint Attendance System) project, where I took charge of the UI development for the management system. Motivated by the dynamic startup culture, I set out to master the MERN stack through practical local projects. My aim is to apply these experiences to innovate and excel in full-stack development roles, contributing to meaningful technological progress.

RECOMMENDATIONS

Name: Kiramat Rahman | Assistant Professor

As a professor in the Department of Computer and Software Technology, I know him since his first year. Mr. Syed Sikandar Shah is a truly outstanding student who has accumulated a long list of both academic honors/achievements and extra-curricular activities. He does his work conscientiously, he always seeks out coursework that challenges him, and he has an amazing capacity for fulfilling his responsibilities in a great variety of activities. He is organized in his goal-setting, yet has learned to keep his options open for the future. His accomplishments will no doubt make him a highly recruited individual for the top graduate schools in the country. Intellectually, he is one of the very best students I have ever worked with. He has the ability to carry out research independently, he is extremely disciplined in his work, his analytical skills are highly developed, and he is always thorough in what he does. In the case of his honors thesis, the result promises to be at a level that one would usually associate with graduate work. In sum, I highly recommend him

Name: Hammad Ali | CEO

During his tenure with Ford 9 Solutions, he proved very hardworking and efficient in his duties. He has excellent communication and interpersonal skills, which helped him to develop good working relationships with his colleagues and management. He performed all the assigned tasks competently, and with commitment and enthusiasm. He proved to be a valuable asset to our organization and we recommend him to any employer seeking a talented and motivated Software Developer.
